The Problem

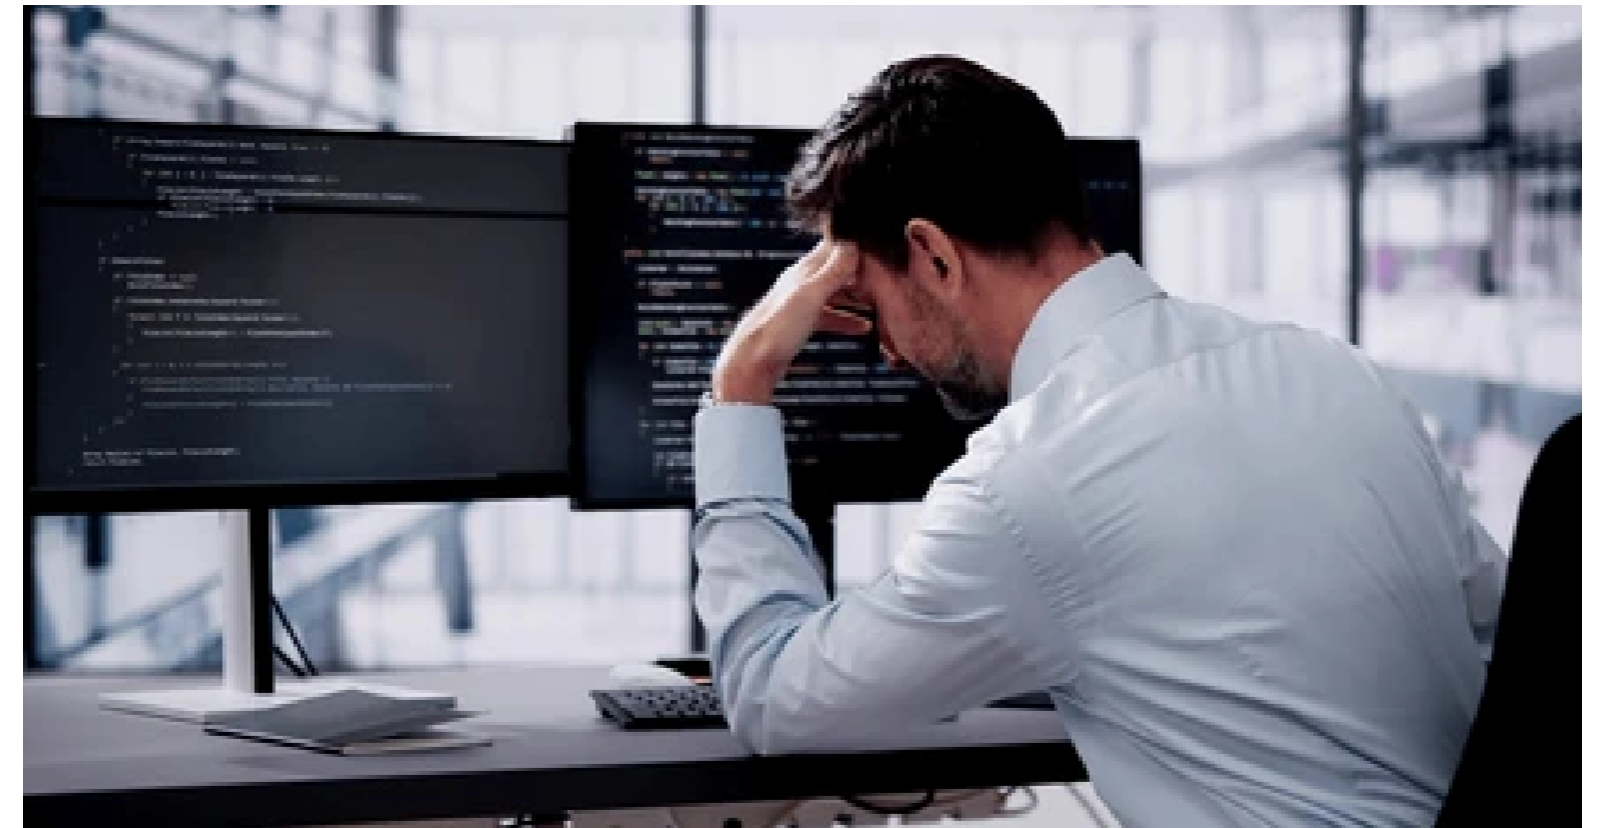

Writing

In the Stack Overflow Developer Survey 2022, when asked “What is the most challenging aspect of your work?”, **documentation consistently ranked among the top pain points.**

Reading

In a 2024 survey of developers on inefficiencies in software engineering, **41% of developers say insufficient documentation is a key cause of wasted time** (ShiftMag, 2024)

Time Lost Due to Poor Docs

Developers spend **19 hours per week** searching for information because **documentation is poor or missing.**

(IDC survey, cited in multiple DevEx studies)

Ineffective documentation costs large organizations up to \$40 million annually, with **developers spending 60% of their time searching for answers** instead of building.

(Brightspot Knowledge Management Report, 2023)

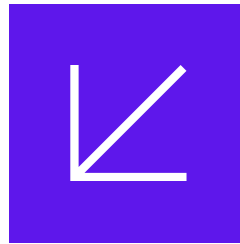

More time consume,
lower productivity

Our Solution AutoDocX

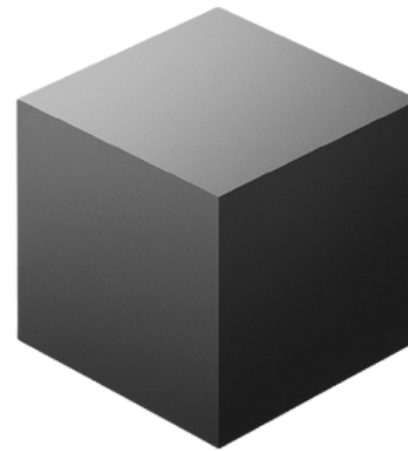

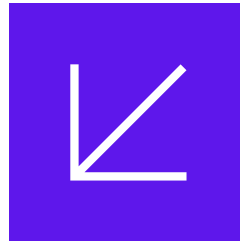

SIMPLIFY WRITING

Auto-generate starter docs and cut repetitive work

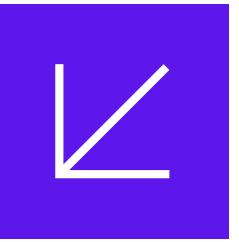

SPEED UP READING

Get instant TL;DR summaries and clear visuals.

AI ASSISTED TEMPLATE

Write faster with smart, context-aware templates.

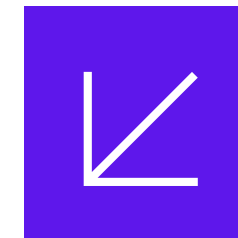

AI CHATBOX
